

HELPFUL REMINDERS FOR USING THE TRASH CHUTE:

- All garbage must be securely wrapped and plastic bagged before depositing into the trash chute.
- No wet garbage, cardboard of any type or any other objects that would tend to hinder the easy fall of trash in the trash chute may be inserted in any trash chute.
- Cardboard boxes, large bottles and items that may clog or damage our trash chute must be taken to the trash bins in the town house trash collection area. 
- Pet trash (sand, litter, paper, etc.) must be wrapped with extra care in plastic bags and taken to the containers in the trash collection area. Pet trash may not be disposed of through any trash chute.
- We have two recycle centers located by the Waimanu Street loading dock, for newspaper, non-deposit glass, glass beverage containers, plastic beverage containers and aluminum beverage containers. 
- Heavy items such as concrete, lumber, tiles, etc. should never be thrown down the trash chutes.

Thank you for your cooperation!
